

# NEET UG 2026

## RE-EXAMINATION PREPARATION STRATEGY

31-Day Battle Plan | May 21 – June 21, 2026

| Total Marks | Biology     | Chem + Physics | Daily Study Hours |
|-------------|-------------|----------------|-------------------|
| 720         | 360 (90 Qs) | 360 (90 Qs)    | 8 – 10 hours      |

*Prep Level: Moderate (basics done, revision needed) | All subjects equally challenging*

## SECTION 1: 31-DAY PHASE PLAN

*The 31 days are split into 4 phases. Each phase has a distinct purpose — do not skip ahead.*

### PHASE 1 — FOUNDATION REVISION (May 21 – May 30 | Days 1–10)

**Focus:** NCERT line-by-line reading + highest-weightage chapters only. No new topics. Build the base strong.

- Biology: Human Physiology (full), Cell Biology, Genetics & Heredity basics
- Chemistry: Chemical Bonding, General Organic Chemistry (GOC), key organic reactions, p-block elements
- Physics: Laws of Motion + WEP, Electrostatics + Current Electricity, Optics
- End of each day: Solve 30 chapter-wise MCQs from topics studied that day
- Make short notes and key-point cards as you go — you will use these in Phase 4

### PHASE 2 — FULL SYLLABUS SWEEP (May 31 – Jun 9 | Days 11–20)

**Focus:** Cover remaining chapters across all 3 subjects. Solve PYQs chapter-wise after every topic.

- Biology: Ecology, Reproduction (plants + human), Biotechnology, Evolution, Biology in Human Welfare
- Chemistry: Electrochemistry, Coordination Compounds, Equilibrium (ionic + chemical), Biomolecules
- Physics: Modern Physics, Rotational Motion, Thermodynamics, Magnetic Effects + EMI, SHM & Waves
- End of each day: 50 mixed MCQs + maintain an error log (write WHY each answer was wrong)
- Weekly: On Day 15 and Day 20, do a rapid 30-min revision of Phase 1 chapters (spaced repetition)

### PHASE 3 — MOCK TESTS + DEEP ANALYSIS (Jun 10 – Jun 17 | Days 21–28)

**Focus:** One full 720-mark timed mock every day. Analysis of mistakes is more valuable than the mock itself.

- Morning (2 PM format): 3-hour timed full mock — simulate exact exam conditions
- Afternoon: Analyse EVERY wrong and guessed answer — root-cause analysis, not just noting the correct option
- Evening: Targeted revision of the specific weak areas identified in that day's mock
- Night: Review short notes, formula sheets, and mnemonics
- Track your score trend daily — identify which subject is pulling you down most

### PHASE 4 — FINAL SPRINT (Jun 18 – Jun 20 | Days 29–31)

**Focus:** Consolidate only. No new topics. Confidence and rest are as important as knowledge now.

- Revise short notes, mnemonics, and diagrams only — no heavy textbook reading
- Zero new topics — only reinforce what you already know
- Day 29 only: Attempt a half-paper light mock (90 questions, 90 minutes)
- Day 30: Rest well, check your admit card, exam centre location, required documents
- Day 30 night: Sleep by 9:30 PM — non-negotiable. Brain consolidates memory during sleep

## SECTION 2: SUBJECT-WISE CHAPTER PRIORITIES

*NEET rewards smart prioritisation. Focus on high-weightage chapters first in phases 1 and 2.*

### Biology — 360 Marks | 90 Questions

**Biology decides your NEET rank. Give it 40% of your total study time daily (two slots).**

#### High Priority — Complete in Phase 1

| Topic                        | Key Chapters                                                                             | Approx Marks | Class |
|------------------------------|------------------------------------------------------------------------------------------|--------------|-------|
| Human Physiology             | Digestion, Circulation, Respiration, Excretion, Nervous system, Locomotion               | ~50 marks    | XI    |
| Genetics & Molecular Biology | Heredity, Mendelian laws, DNA replication, Transcription, Translation, Gene regulation   | ~45 marks    | XII   |
| Plant Physiology             | Photosynthesis (light + dark), Respiration, Plant growth hormones & regulators           | ~30 marks    | XI    |
| Ecology                      | Ecosystems, nutrient cycles, Biodiversity, Environmental issues, Population interactions | ~28 marks    | XII   |
| Reproduction                 | Reproduction in flowering plants, Human reproduction, Reproductive health, STDs          | ~28 marks    | XII   |

#### Medium Priority — Cover in Phase 2

- Cell Biology & Cell Division (Mitosis, Meiosis — diagrams important)
- Biotechnology & Its Applications (recombinant DNA, PCR, GMOs)
- Evolution (Darwinism, Modern synthetic theory, Hardy-Weinberg)
- Biology in Human Welfare (health, disease, microbes, drugs)
- Diversity in Living World (kingdom classification, NCERT tables)
- Structural Organisation in Plants & Animals

### Chemistry — 180 Marks | 45 Questions

**Organic Chemistry alone can give you 50+ marks. Prioritise it above everything else in Chemistry.**

### High Priority — Complete in Phase 1

| Topic                               | Key Chapters                                                                               | Approx Marks | Class  |
|-------------------------------------|--------------------------------------------------------------------------------------------|--------------|--------|
| Organic Chemistry (GOC + Reactions) | GOC, Hydrocarbons, Haloalkanes, Alcohols, Aldehydes/Ketones, Carboxylic acids, Amines      | ~55 marks    | XI+XII |
| Chemical Bonding                    | VSEPR theory, hybridisation, MO theory, polarity, hydrogen bonding, intermolecular forces  | ~20 marks    | XI     |
| p-block & d-block Elements          | Group 15-18 properties, transition metals, important reactions, uses                       | ~20 marks    | XII    |
| Coordination Compounds              | Nomenclature, isomerism (geometric, optical), crystal field theory, colour, magnetic       | ~15 marks    | XII    |
| Equilibrium                         | Chemical equilibrium ( $K_p$ , $K_c$ ), ionic equilibrium, pH, acid-base, buffer solutions | ~15 marks    | XI     |

### Medium Priority — Cover in Phase 2

- Thermodynamics & Thermochemistry (enthalpy, entropy, Gibbs free energy)
- Electrochemistry (cell potential, Nernst equation, conductance)
- Atomic Structure (Bohr's model, quantum numbers, orbitals)
- Biomolecules & Polymers (carbohydrates, proteins, nucleic acids, types of polymers)
- Chemical Kinetics (rate laws, Arrhenius equation, order of reaction)
- Solutions (colligative properties, Raoult's law, van't Hoff factor)

### Physics — 180 Marks | 45 Questions

**Physics is calculation-heavy. Focus on formulae, derivation logic, and concept MCQs from PYQs.**

### High Priority — Complete in Phase 1

| Topic                                | Key Chapters                                                                             | Approx Marks | Class |
|--------------------------------------|------------------------------------------------------------------------------------------|--------------|-------|
| Electrostatics + Current Electricity | Coulomb's law, capacitors, Ohm's law, Kirchhoff's laws, Wheatstone bridge, potentiometer | ~35 marks    | XII   |

|                        |                                                                                                           |                  |     |
|------------------------|-----------------------------------------------------------------------------------------------------------|------------------|-----|
| Optics                 | Ray optics (mirrors, lenses, prisms), Wave optics (interference, diffraction, polarisation)               | <b>~25 marks</b> | XII |
| Modern Physics         | Photoelectric effect, Einstein's equation, Bohr's model, radioactivity, nuclear reactions, semiconductors | <b>~25 marks</b> | XII |
| Laws of Motion + WEP   | Newton's laws, friction, work-energy theorem, power, conservation of energy, elastic/inelastic collisions | <b>~20 marks</b> | XI  |
| Magnetic Effects + EMI | Biot-Savart, Ampere's law, Lorentz force, Faraday's law, Lenz's law, motional EMF                         | <b>~20 marks</b> | XII |

### Medium Priority — Cover in Phase 2

- Rotational Motion (moment of inertia, torque, angular momentum, rolling motion)
- Thermodynamics & Kinetic Theory (laws of thermodynamics, ideal gas, specific heats)
- SHM & Waves (oscillations, standing waves, Doppler effect, beats)
- Gravitation (Kepler's laws, satellites, escape velocity, gravitational potential)
- Alternating Current (RLC circuits, resonance, power factor, transformers)

# SECTION 3: DAILY SCHEDULE

Use this schedule for Phases 1 and 2. In Phase 3, replace the morning slots with your full mock test (2 PM – 5:15 PM exam format).

| Time               | Activity                                                  | Subject / Type      |
|--------------------|-----------------------------------------------------------|---------------------|
| 6:30 AM            | Wake up, freshen up, light breakfast                      | —                   |
| 7:00 – 9:00 AM     | Biology — Slot 1 (NCERT deep read, diagrams, key facts)   | Biology (120 min)   |
| 9:00 – 9:15 AM     | Short break — hydrate, stretch                            | Break               |
| 9:15 – 11:15 AM    | Chemistry — chapter revision + theory reading             | Chemistry (120 min) |
| 11:15 – 11:30 AM   | Snack break                                               | Break               |
| 11:30 AM – 1:00 PM | Physics — concepts + numericals practice                  | Physics (90 min)    |
| 1:00 – 2:00 PM     | Lunch + rest — MANDATORY. No studying.                    | Break               |
| 2:00 – 3:30 PM     | PYQs from today's chapters (all 3 subjects)               | Practice (90 min)   |
| 3:30 – 3:45 PM     | Walk / stretch / hydrate                                  | Break               |
| 3:45 – 5:45 PM     | Biology — Slot 2 (remaining chapters or harder topics)    | Biology (120 min)   |
| 5:45 – 6:30 PM     | Exercise / gym / relax                                    | Break               |
| 6:30 – 8:00 PM     | Weak topic deep-dive or missed chapters                   | Revision (90 min)   |
| 8:00 – 9:00 PM     | Dinner + unwind. No phone doom-scrolling.                 | Break               |
| 9:00 – 10:00 PM    | Quick revision — short notes, flashcards, mnemonics       | Consolidation       |
| 10:00 PM           | Sleep — non-negotiable. Memory consolidates during sleep. | Sleep               |

| Daily Study Hours                                                                                                          | Phase 3 Adjustment                                                                                                                   |
|----------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| 8 – 10 hours total (excluding breaks)<br>Biology: ~4 hrs   Chemistry: ~2 hrs   Physics: ~1.5 hrs   PYQs + Revision: ~2 hrs | Replace morning slots with timed 3-hour full mock (2 PM format).<br><br>Afternoon = analysis. Evening = targeted weak-area revision. |

## SECTION 4: KEY PREPARATION TIPS

### The Golden Rules

**1. NCERT is everything** — 70%+ of NEET questions come directly from NCERT text. Read every line, every diagram caption, every example box, and every table. Do not rely on notes alone — go back to the source.

**2. Biology first, always** — Biology is 360 marks — exactly 50% of the paper. Give it 40% of your daily study time (two separate slots). Your rank in NEET is almost entirely determined by how well you do in Biology.

**3. PYQs are your best mock material** — The last 10 years of NEET PYQs show clear repeating patterns — concepts, specific facts, even near-identical questions. In Phases 1-2, solve PYQs chapter-wise after each topic, not as random full mocks.

**4. Maintain an error log** — For every wrong answer in any practice session, write: (a) what the correct answer is, (b) why your answer was wrong, (c) the concept or fact you missed. Review this log every 3 days. This is what separates 600+ scorers.

**5. Spaced repetition is mandatory** — Revise Day 1 chapters on Day 4, then Day 7, then Day 15. Memory compounds with spaced review — moving forward without looking back means forgetting everything you studied.

**6. Simulate exam conditions from Day 21** — The re-exam is 2 PM to 5:15 PM. In Phase 3, attempt your full mocks at exactly 2 PM daily to train your brain and body for peak performance at that time.

**7. Sleep 7-8 hours every night** — Sleep is when your brain consolidates the day's learning into long-term memory. Pulling all-nighters does the opposite — it impairs memory consolidation and slows recall speed. Non-negotiable: sleep by 10 PM.

**8. No new topics in Phase 4** — In the last 3 days before the exam, stop learning anything new. Only revise what you already know. New material causes confusion and undermines confidence. Trust your preparation.

### Quick Reference: What to Do Each Week

| Week                                         | Primary Task                                                                                                                | Evening Routine                    |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| <b>Week 1</b><br><b>May 21-27</b>            | Bio: Human Physiology + Genetics<br>Chem: GOC + Chemical Bonding<br>Physics: Electrostatics + Laws of Motion                | 30 chapter MCQs + make short notes |
| <b>Week 2</b><br><b>May 28 – Jun 3</b>       | Bio: Plant Physiology + Cell Biology<br>Chem: p-block, d-block, Organic reactions<br>Physics: Optics + Modern Physics       | 50 mixed MCQs + error log update   |
| <b>Week 3</b><br><b>Jun 4 – Jun 9</b>        | Bio: Ecology + Reproduction + Biotechnology<br>Chem: Coordination + Electrochemistry<br>Physics: Magnetism + Thermodynamics | Spaced revision of Weeks 1-2       |
| <b>Week 4</b><br><b>Jun 10 – Jun 16</b>      | Full mock every day (8 mocks total)<br>Analyse every wrong/guessed answer                                                   | Targeted weak-chapter revision     |
| <b>Last 4 days</b><br><b>Jun 17 – Jun 20</b> | Short notes only. No new topics.<br>Half-mock on Jun 18, then rest                                                          | Sleep by 10 PM. Check documents.   |
